Profile

Hello Indica Labs, I know you're busy so **here's what you need to know about me:**

I am based in Albuquerque New Mexico and I work hard to create responsive, clean, and user-friendly applications with HTML, CSS, and React; also tackling backend with Node express and Mongoose.

Relevant Projects

Front end Website for Painter

Problem solving with client feedback

- Designed and published a website for a freelance illustrator
- Worked closely with client to ensure needs were met on a timely basis
- Tech employed: HTML, Bootstrap, JavaScript, Facebook page API

Front end Website for a restaurant

Creating a modern feel to small town restaurants

- Used React Js for a single page design
- Utilized Bootstrap to create a comfortable mobile experience for user
- Google maps API was used for an example location as well as a sample reservation form

Blog Site

Creating a space for mobile gamer enthusiasts

- Provided a hub for a gaming community to post and comment
- Used Node to route multiple pages
- CRUD method used to allow user control both posts and comments

Education

Udemy – The Web Developer Bootcamp (2018)

University of New Mexico – Associates, Liberal Arts (2017)

Central New Mexico – Associates, Business (2016)

Soft Skills

Customer service experience
Interpersonal communication skills
Collaborative
Problem solving in stressful environments
